CAREER OBJECTIVE

"Highly skilled Senior Frontend Developer with **15 years** of experience in the IT industry, seeking to leverage expertise in modern web technologies and micro-frontend architectures to drive innovative solutions in a dynamic, growth-oriented environment**"**

PROFESSIONAL SUMMARY

- **Results-driven Senior Frontend Developer** with 7 years of comprehensive experience creating and optimizing scalable web applications, with a focus on maintaining high performance and clean, maintainable code.
- **Proficient in Angular 14, 15, and 16**, including a deep understanding of **RxJS** core concepts, Agular's latest control flows, and **SOLID** principles, delivering high-quality applications aligned with best coding practices.
- **Experienced in writing scalable**, testable, and performant code in JavaScript and TypeScript, integrating single-page applications (SPA) with RESTful APIs within a microservices architecture to enhance modularity and efficiency. Specialized in micro-frontend development architectures.
- **Extensive experience** in end-to-end and **unit testing**, including Jest, Jasmine, and Karma with over 80% test coverage
- **Skilled in state management** using libraries such as **NgRx** and **Redux**, optimizing application responsiveness and performance.
- **Proven record of managing CI/CD** pipelines through Jenkins, GitHub Actions, and deployment server pipelines to streamline releases and maintain stable environments across multiple deployment stages.
- **Broad experience in Agile and Scrum methodologies**, with strong cross-functional collaboration in finance and insurance domains, facilitating effective teamwork with UX, Product, and QA teams.
- **Proficient in Git operations** including daily pull requests, merging, and coordinating deployment across development branches.
- **Expert in Adobe Experience Management** (AEM) for site configurations and managing JSON file uploads across environments, ensuring efficient and reliable content management and deployment
