Professional Summary

Senior Frontend Developer and AI Product Engineer with 18+ years of IT experience, specializing in Angular (6–21), TypeScript, and the integration of Generative AI into enterprise applications. Co-Founder and AI Product Engineer at Mielikkix AI, where I architect and build a multi-tenant SaaS platform of business AI agents using Python FastAPI, React, PostgreSQL, Docker, Large Language Model (LLM) APIs, Retrieval-Augmented Generation (RAG), and agent workflows. Proven experience building scalable single-page applications, micro-frontends, AI-powered user experiences, and production CI/CD pipelines across finance and insurance domains in Europe, Australia, and Asia.

Technical Skills

Angular Ecosystem: Angular 6, 12, 14, 16, 21, Angular CLI, RxJS, NgRx, Signals, Standalone Components, New Control Flow Syntax, Angular Material, Lazy Loading, Reactive Forms

AI and Generative AI: Anthropic Claude API, OpenAI API, LangChain.js, Llama 3.2, ChatGPT, GitHub Copilot, Claude Code, Prompt Engineering, Generative AI Integration, AI Agents, AI Agent Workflows, MCP (Model Context Protocol) Servers, Retrieval-Augmented Generation (RAG) Pipelines, LLM Provider Abstraction (OpenAI, Groq, Gemini, Ollama), Speech-to-Text and Text-to-Speech APIs, Twilio Voice, Multi-Agent Orchestration, Slack Webhooks, AI-driven UX

Other Frameworks and Libraries: React 18, Vite, TanStack Query, Astro, Next.js, Svelte, SvelteKit, Ionic, NestJS, Express, Node.js, FastAPI, Axios

Programming Languages: Python, TypeScript, JavaScript (ES6+), C#, HTML5, CSS3, SCSS, JSON

State Management and Architecture: NgRx, Redux, RxJS, SOLID Principles, Micro-Frontend Architecture, Single-Page Applications, Microservices

Testing: Jest, Jasmine, Karma, Vitest, Unit Testing, End-to-End Testing (80%+ coverage)

UI and UX Design: PrimeNG, Bootstrap, KendoUI, Tailwind, Figma, Responsive Design, Accessibility

APIs and Data: REST APIs, GraphQL, Postman, Swagger, MongoDB, SQL Server, PostgreSQL, SQLAlchemy 2.0, Alembic, Multi-Tenant Architecture

DevOps, Cloud and CI/CD: AWS, Docker, NGINX, Jenkins, GitHub Actions Workflows, Docker Compose, Linux VPS Deployment, Vercel, Webpack, Babel, NPM, Git, GitHub, Python 3.12, APScheduler

CMS, Analytics and Tools: Adobe Experience Manager (AEM), Adobe Analytics, Jira, VS Code, Agile, Scrum, PCI-DSS Compliance, GDPR Compliance

AI Projects

Mielikkix AI — Multi-Tenant AI SaaS Platform

Python FastAPI | React | Astro | PostgreSQL | RAG | AI Agents | Docker | LLM APIs

Sellable platform of business AI agents with an embeddable RAG chat widget, multi-tenant dashboard and subscription tiers; agents share a provider-abstracted LLM core and cover voice reception, booking, reviews and SEO audits.

Contact Form Router — AI Classification & Routing

React | Python FastAPI | Claude API | Slack

Uses the Anthropic Claude API to classify incoming messages by intent (sales, support, partnership, spam) and route them to dedicated Slack channels in real time, returning confidence scores and reasoning. Deployed on Vercel with a Python FastAPI serverless backend and a React 18 + Tailwind CSS frontend.

Professional Experience

AI Product Engineer / Co-Founder — Mielikkix AI

Mielikkix AS | Remote | May 2026 – Present

- Architect and build a multi-tenant SaaS platform of business AI agents as a monorepo: Python 3.12 FastAPI backend, React and TypeScript dashboard, embeddable chat widget and Astro marketing website.
- Deliver the RAG-grounded chat widget with lead capture and the Voice Receptionist (Twilio Voice), Booking Assistant (connected to Google Calendar), Review & Reputation and SEO Audit & Optimization agents; build Support Triage as the next agent.
- Design a shared agent-core with a provider-abstracted LLM client (OpenAI, Groq, Gemini, Ollama), RAG and memory layer, and a multi-tenant PostgreSQL schema (SQLAlchemy 2.0, Alembic) with subscription-tier entitlements and APScheduler jobs.

- Deploy with Docker Compose on a Linux VPS with GitHub Actions CI/CD; build the React, Vite and Tailwind CSS dashboard; maintain GDPR-compliance documentation; use Claude Code for AI-assisted development.

Senior Frontend Developer (Angular)

Allianz Technology | Bangkok, Thailand | Jun 2022 – Present

- Develop and maintain 3 Angular and 5 Svelte customer service portals serving Allianz insurance customers across Europe, Australia, and Asia.
- Led the upgrade of existing Angular applications to Angular 21, adopting Signals, Standalone Components, and the new control flow syntax to modernize the codebase and improve runtime performance.
- Built MCP (Model Context Protocol) servers, AI agents, and AI agent workflows to display policy details and real-time notifications on the Customer Service Portal (CSP) dashboard, delivering intelligent, personalized experiences for insurance customers.
- Integrated Generative AI capabilities using OpenAI APIs and LangChain.js to enhance self-service customer workflows and automated content generation.
- Designed and maintained GitHub Actions workflows for automated build, test, and deployment pipelines, streamlining release cycles across multiple environments.
- Implemented PCI-DSS compliant payment functionality in Angular, reducing payment processing time by 25% and elevating user experience.
- Achieved 80%+ unit test coverage for Angular and Svelte components using Jest, significantly reducing production defects.
- Delivered quarterly releases of the customer service portal for Australian and European markets; awarded Certificate of Appreciation in December 2024.

Associate Specialist, Frontend (Angular)

Synechron Technologies Pvt. Ltd. | Pune, India | May 2019 – May 2022

- Designed and developed dynamic Angular 12 components, custom directives, and reactive data flows using TypeScript and RxJS, improving application performance by 20%.
- Led code reviews and enforced SOLID principles across the frontend codebase, reducing technical debt by 30%.
- Optimized state management with NgRx (Redux pattern), achieving 15% faster application load times.
- Built intuitive user interaction screens with HTML5, SCSS, Bootstrap, and KendoUI, supporting a 25% increase in customer retention.
- Awarded the STAR Award in August 2020 for code optimization and reaching 80% unit test coverage in Angular.

Senior Software Engineer

Emerson Innovation Center | Pune, India | Oct 2015 – May 2019

- Developed and maintained enterprise web applications using Angular 6, .NET Framework, and SQL Server, sustaining 99.9% uptime.

Senior Software Engineer, Product Development

Techspeed Inc. | Pune, India | Jun 2007 – Jul 2013

- Led the development of data-processing web applications in ASP.NET MVC, increasing data-entry efficiency by 25%.

Education

MBA in IT Management and International Business Management (In Progress, Semester IV), Bharati Vidyapeeth (Online), Expected Feb 2027

Bachelor of Computer Engineering August 2006

Certifications

- AI Passport Certificate of Completion, Allianz Technology, April 2026
- Claude Code in Action, Anthropic, March 2026

Languages

English: C1 Advanced. German: A1 Beginner.
